DuBois Regional Medical Center

Welcome to DuBois Regional Medical Center's East Campus.

This map has been designed to provide information for travel to our East Campus, help in finding parking and to show departments and other amenities on all three floors at our hospital building. A complete DRMC visitor guide is available by contacting our Corporate Communications Department at 375-3494 or by e-mailing jpbrennan@drmc.org.

Navigating our East building can be challenging until you learn which entrance and elevator suits your needs the best. We have designated Entrance A, our Admissions and Registration entrance, as the main way to access services at

DRMC East. By using this entrance you can easily get to services such as dialysis, The Wound Center and Hyperbarics, Gateway Area Medical Associates and the Outpatient Behavioral Health Center.

By using Entrance C, the North Wing Entrance, you are able to easily access physician practices on the second floor, Diabetes and Weight Management Center, as well as our outpatient testing clinics (Apnea, Developmental, etc.)

Those using Entrance C to get to services such as Gateway Area Medical Associates and Outpatient BHS must take the elevators to the ground floor and continue to the left to the Mengle Wing Elevators to access these services.

A complete listing of DRMC services and physicians is available online at www.drmc.org.

We thank you for choosing DRMC for your healthcare needs.
